DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a liquid crystal display element, classified in class 349, subclass 153.
 - II. Claims 7-11, drawn to a method for manufacturing a liquid crystal display element, classified in class 349, subclass 187.
2. The inventions are distinct, each from the other because:
3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the liquid crystal display element (product) can be formed by a different process wherein the specific sequence of the indicated steps need not be followed in order to result in a similar product such as the step of injecting the liquid crystal into each of the liquid crystal injection areas and sealing these liquid crystal injection openings before cutting the liquid crystal injection areas along a virtual lines.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. A telephone call was made to Mr. Blumenthal on 08/22/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.
